SPEED BADMINTON

SPEED 4400 SET
DSK490114

2 short Speed 4400 rackets for a better balance and for starters in speed badminton (tempered light weight aluminum, 54.5cm long, 17.3mm frame profile, 165g, resistant string) for the speed badminton hobby player, tube of 3 speed badminton shuttles (2 Racer, 1 Starter), all in a stylish backpack with net front.

SCHILDKRÖT SPEED BADMINTON SET
DSK970906

Schildkröt speed badminton set with 2 speed badminton rackets, (length: 54,5cm, weight: 165g) incl. 3 speed badminton shuttles. The perfect set for the garden or the beach.

BEACHMINTON SET
DSK449419

2 beachminton rackets (light aluminum head, steel shaft, 58.5 cm length, 12.5mm frame profile, 105g, durable string), 2 small beach shuttles for wind-stable beachminton/badminton leisure games, high-quality carry bag with zip and length-adjustable straps. Colour: black-neon green.

**SPEED BADMINTON
LED SHUTTLES**
DSK490181

High quality, aerodynamically optimized speed badminton LED shuttles for playing in the dark. The LED light inside the shuttle can be activated by a switch when needed. The green LED light is well visible in the dark. It makes the game more attractive and generates curious eyes. Content: 4 LED shuttles (speed: fast, yellow head, LED green).

**SPEED BADMINTON
SHUTTLES**
DSK490182

6 high quality, aerodynamically optimized speed badminton shuttles in a practical tube with screw cap. The new construction supports stable flying characteristics and improves lifetime. Content: 2 STARTER (speed: medium, red head), 4 RACER (speed: fast, yellow head).

BADMINTON

MAGIC NIGHT

BADMINTON

**BADMINTON SET
MAGIC NIGHT LED**
DSK449405

🇬🇧 2 robust rackets made of tempered steel, visible T-joint, multifile string, with grommets, 2 synthetic shuttlecocks with LED-light in a tube (1 ball white with green light, 1 ball yellow with red light, incl. on/ off bottom, burning duration each approx. 10 hours), in a high quality carry bag with zipper and adjustable shoulder strap.

**SHUTTLECOCKS
MAGIC NIGHT LED**
DSK479123

🇬🇧 3 synthetic shuttlecocks (PE) with LED-light, randomly assorted white ball with green light and yellow ball with red light, incl. on/ off bottom, burning duration each approx. 10 hours, in a paper tube. Batteries: each 1x CH927, not interchangeable.

BAT SELECTION

Playing better with more fun. Table tennis is a fast and skillful sport. Spin and speed are most important and everybody – top player and beginner – enjoys the game more with bats using a good rubber, sponge and wood. The better the material, the faster your game improves!

The COLOURS used to show the levels of quality are used on the front label to show the respective quality level.

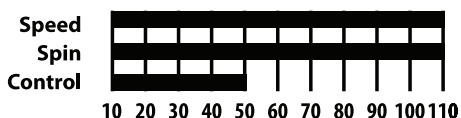

Type of game, sponge thickness

↑ ATTACK PLUS 2.3mm sponge
↑ ATTACK 2.0/2.1mm sponge
○ ALLROUND 1.7/1.8mm sponge
→ CONTROL 1.5/1.6mm sponge

All rubbers of levels 300 to 7000 are ITTF approved.

Describes degree of speed, control, and spin techniques possible with this rubber / sponge combination

FEATURES & TECHNOLOGY

CARBOTEC

🇬🇧 Table tennis bats made of Carbon present a very important innovation in table tennis. For the first time in the table tennis history the wooden bat has been replaced by the new material. The carbon bats are harder and more twist-resistant than the traditional bats made of wood, and thus, offer an increased return of energy which means more power and a more dynamic game.

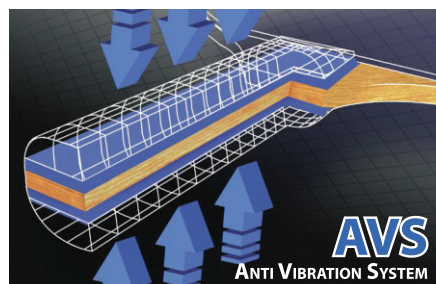

CARBON LAYER

🇬🇧 Carbon layers in the plywood make the blade stiffer and enlarge the sweet spot. These blades produce less vibrations and offer a higher basic speed. The feel is considerably harder and more direct, the result is a lot of power and precision. Suitable for offensive players with high demands.

ADJUSTABLE BALANCE POINT

🇬🇧 The ABP allows an individual adjustment of the balance point of the bat to suit individual styles of play. Head heavy balance: weight distribution towards the head of the bat offering more striking power for an offensive style of play. Handle light balance: weight is distributed closer to the handle of the bat allowing more accurate shots and ball slicing for a controlled style of play. Simply turn, pull, and adjust!

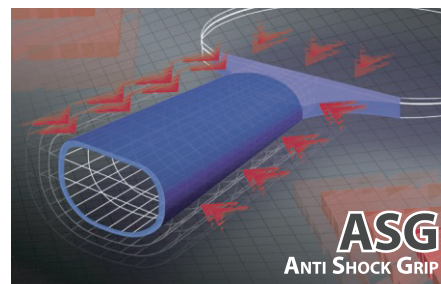

ANTI-VIBRATION SYSTEM

🇬🇧 The Anti-Vibration-System (AVS) is a shock-absorbing system developed by Schildkröt. AVS offers improved ball control and reduced vibrations caused by the impact energy of the ball due to two special shock-absorbing soft layers laminated between blade and handle. As a result, AVS increases the accuracy of shots for both the defensive and the offensive style of play.

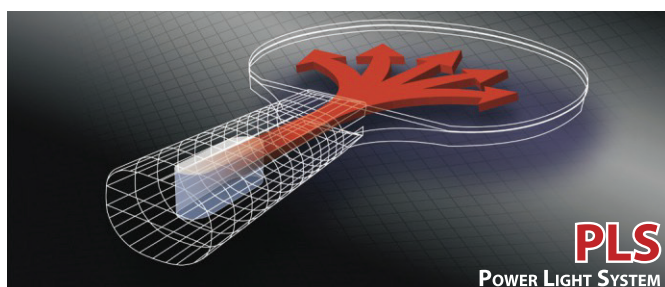

CORK HANDLE

🇬🇧 The shock-absorbing cork handles always lie perfectly in your hand, even with wet hands. They ensure a perfect grip and an optimal control.

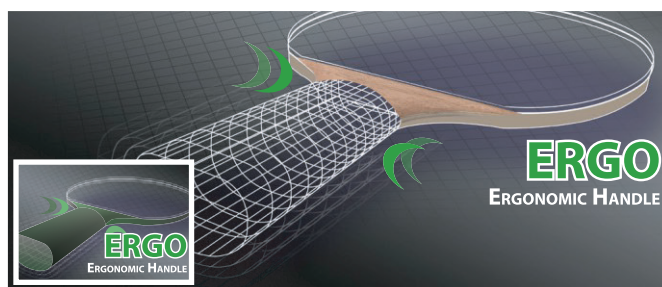

ANTI-SHOCK GRIP

🇬🇧 Due to the use of shock-absorbing foam covers the Anti Shock Grip is an all-round dampened grip system. Vibrations are substantially reduced which results in a comfortable playing feel with a better control. Thus the handle lies extremely well in the hand, without any feeling of pressure. Moreover, the foam overgrips are sweat absorbent and allow a firm and safe hold.

POWER LIGHT SYSTEM

🇬🇧 The hollow handle of the Power Light System (PLS) reduces the total weight of the blade and transfers the centre of gravity towards the head of the blade, thus offering much more power and speed while maintaining excellent feel.

ERGONOMIC HANDLE

🇬🇧 The ERGO (ergonomic) handle fits anatomically perfect to the hand, handle and bat feel to be one! The rounded shape of the ERGO part avoids pressure in the hand and provides a particularly comfortable and pleasant handle feel.
